Versatile Developer (Fullstack / Game Dev) with a solid foundation in Python, Flutter, and web stack (HTML/CSS/JS, MySQL). Passionate about game creation, I have practical experience with Unity (C#) and Godot (GDScript), supported by skills in 3D modeling (Blender) and design (Photoshop). I am seeking a remote or on-site position within the European Union where I can contribute my technical and creative skills. I am ready to take on roles as a Developer, Technical Artist, or Designer. Currently based in Italy with a valid work permit.
